

THE PLAN BEHIND YOUR POWER

WHO WE ARE

At Loftin Equipment Co. we believe in power as a certainty in an uncertain world. Our team has an uncompromising customer focus. You'll find we have a dedication to excellence from our internal processes to serving our customers in the field. Our team is comprised of passionate people who deliver; we focus on providing only premium quality products and we approach our business with a long term outlook by reinvesting for what lies ahead.

PLANNED MAINTENANCE

Your generator power system needs periodic maintenance to keep it in top condition and ready to operate when the lights go out. These services are available on any make or model. Advanced test equipment is required to thoroughly test your generator to the original factory standards. Every effort will be made to ensure that if your equipment has a weak component, or won't hold up to industry standards, it will be found.

PARTS SUPPORT

We take great pride in our ability to back up our product offerings and have invested heavily in the people and resources to sustain a first-class level of aftermarket support. The key to this is both our parts availability and experienced staff, which has full knowledge of all the KOHLER®, Kubota®, and Scania® engine parts, for which we are an authorized distributor. We service all engine and generator brands and also carry an extensive list of parts to support your uptime requirements in the field and on planned maintenance agreements.

RENTAL EQUIPMENT

Loftin Equipment Co. is your full-service supplier of emergency backup and prime power for a variety of critical applications. Wherever and whenever you need it, we're on hand with generators, redundant power systems, power distribution equipment, HVAC systems, and mobile lighting. We can provide generators from 20 kW to 2,000 kW, as well as Dual Pack redundant power. The Dual Pack redundant power system contains two generators which operate in-phase, sharing the load. If one generator should ever malfunction, the other takes over the load entirely without missing a beat.
